Date Submitted
August 27, 2020

Executive Summary

B.I.G. Consulting Inc. (BIG) was retained by Distrikt Capital (Client), to complete a Phase One Environmental Site Assessment (ESA) at 3064 Trafalgar Road, Oakville, Ontario (Site), as shown on Figure 1. The property is currently used for residential land use. The objective of the investigation was to support the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation 153/04 (O.Reg.153/04), as amended. It is BIG's understanding that the Site will be redeveloped to two (2) high-rise residential buildings with five (5) levels of underground basement in the future.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with O.Reg.153/04 and in accordance with generally accepted professional practices.

The Site is located north of Dundas Street West and west of Trafalgar Road in Oakville, Ontario. The Site location plan is shown on Figure 1. The Site measures approximately 7,500 m² in size and is currently occupied by a one (1)-storey building (Site building). The Site building has a footprint of approximately 50 m² and occupy approximately 1 % of the Site. The Site building was likely constructed in the 1960s. The areas surrounding the Site building are covered with gravel, grass and shrubs.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the Site. However, a detailed review of regulatory compliance issues was beyond the scope of the investigation. This Phase One ESA does not constitute an audit of environmental management practices.

A total of six (6) PCAs were identified at the Site, none of which were considered as APECs, as they were either located at a significant distance from the Site or were located hydraulically downgradient or trans-gradient to the Site. Therefore, there are no APECs associated with the Site.

Based on the findings and conclusions of this Phase One ESA, a Phase Two ESA is not required to assess the soil and groundwater conditions at the Site.

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

1. Introduction

B.I.G. Consulting Inc. (BIG) was retained by Distrikt Capital (Client), to complete a Phase One Environmental Site Assessment (ESA) at 3064 Trafalgar Road, Oakville, Ontario (Site), as shown on Figure 1. The property is currently used for residential land use. The objective of the investigation was to support the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation 153/04 (O.Reg.153/04), as amended. It is BIG's understanding that the Site will be redeveloped to two (2) high-rise residential buildings with five (5) levels of underground basement in the future.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with O.Reg.153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, BIG makes no express or implied warranties regarding its services and no third-party beneficiaries are intended.

1.1 Site Information

The Site is located north of Dundas Street West and west of Trafalgar Road in Oakville, Ontario. The Site location plan is shown on Figure 1. The Site measures approximately 7,500 m² in size and is currently occupied by a one (1)-storey building (Site building). The Site building has a footprint of approximately 50 m² and occupy approximately 1 % of the Site. The Site building was likely constructed in the 1960s. The areas surrounding the Site building are covered with gravel, grass and shrubs.

The Site is bound to the north by a residential property, to the east by Trafalgar Road followed by residential properties, to the west by vacant land followed by Morrison Creek (NRF) and to the south by residential properties. The surrounding properties are shown on Figure 2.

The legal description of the Site as obtained from the chain of title is "Part Lot 13, Concession 1 Trafalgar, North of Dundas Street, as in 787579; Oakville/Trafalgar". The Property Identification Number (PIN) is 24929-0103 (LT). The legal survey plan is included in Appendix B.

2. Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

a) Reviewing the historical occupancy of the Site through the use of available archived and relevant municipal and business directories, Fire Insurance Plans (FIPs), topographical maps, and aerial photographs;
b) Contacting municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
c) Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Site and surrounding properties within a 250 metres (m) radius of the Site;
d) Reviewing available geological maps, well records and utility maps for the vicinity of the Site;
e) Obtaining and reviewing a chain of title and assessment rolls for the Site;
f) Reviewing available reports previously completed at the Site;
g) Conducting interviews with designated Site representative(s) as a resource for current and historical Site information, as well as to provide BIG staff with unrestricted access to all areas of the Site and Site buildings as required by O.Reg. 153/04, as amended;
h) Conducting a Site reconnaissance in order to identify any land use practices that may have impacted the environmental condition of the Site;
i) Conducting a reconnaissance of the surrounding properties from the Site and publicly accessible areas in order to identify any land use practices that may have impacted the environmental condition of the Site; and,
j) Preparing a report to document the findings.

The following sections summarize the information gathered by BIG during the Phase One ESA and identifies Potentially Contaminating Activities (PCAs) on the Site and in the Phase One Study Area, and Areas of Potential Environmental Concern (APECs) associated with the Site. APECs and PCAs are defined in O. Reg 153/04, as amended.

In completing the scope of work, BIG did not conduct any intrusive investigations, including sampling, analyses or monitoring.

BIG personnel who conducted assessment work for this project included Mr. Fernando Contento, M.Env.Sc., P.Geo. and Mr. Darko Strajin, P.Eng. An outline of their qualifications is provided in Appendix C.

3. Records Review

3.1 General

3.1.1 Phase One Study Area Determination

The Site is located west of Trafalgar Road and north of Dundas Street East, in Oakville, Ontario. The Phase One Study Area consists of properties within a distance of 250 m from the Site boundaries. The Phase One Study Area is bound by:

a) Residential properties to the north;
b) Residential properties to the west;
c) Residential properties to the east; and,
d) Commercial properties to the south.

The surrounding properties within the Phase One Study Area predominantly consist of residential land use. All properties wholly or partly within 250 m from the Site boundaries as presented in Figure 2 were included in the Phase One Study Area.

3.1.2 First Developed Use Determination

Based on the reviewed records, the Site was first developed from vacant and undeveloped to residential in the 1960s.

3.1.3 Fire Insurance Plans

BIG contracted Opta Information Intelligence to perform a search for FIPs, Property Underwriters Reports and Property Underwriters Plans within the Phase One Study Area. Based on the search, an FIP dated 1967 from Opta covered the Phase One Study Area. The FIP obtained from Opta is included in Appendix H.

The following table summarizes the features of the Phase One Study Area as indicated on the reviewed FIPs. Building details were limited on the FIPs as indicated below.

	1967
South	a) An auto service station is located at 305 Dundas Street East, approximately 120 m south with a gasoline underground storage tank (UST) and a diesel UST located in the eastern portion of the property.

Based on the information gathered from the review of the FIPs, the following PCAs were identified:

a) An auto service station was located at 305 Dundas Street East, approximately 120 m south with a gasoline underground storage tank (UST) and a diesel UST located in the eastern portion of the property in 1967. The former USTs are associated with PCA#10 – Commercial Autobody Shops and PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

3.2 Chain of Title

A chain of title was completed for the Site by Stewart Davey, an independent title searcher. The chronological Chain of Title provided to BIG is provided in Appendix D, summarized in Table II, and indicated the following entities associated with the ownership as part of the Site:

Year	Name of Owner
3064 Trafalgar Road – 24929-0103 (LT)	
Prior to 1808	The Crown
1808 to 1809	Abraham Grubb
1809 to 1816	Peter Cline
1816 to 1836	James Thompson
1836 to 1880	Estate of James Applebe (Sr.)
1880 to 1863	James Applebe (Jr.)
1883 to 1901	Estate of George Ford
1901 to 1904	John E. Ford
1904 to 1943	Estate of Francis Edward Ford
1943 to 1952	Clarence Featherstone Ford
1952 to 1955	Wilfred Samuel Hall
1955 to 1956	Allan W. Hall and Wife
1956 to 1957	Frederick J. MacNamara and Wife William Scade
1957 to 1965	Albert Peters and Wife
1965 to 1972	The Estate of Mary Josephine Hotson
1972 to 1978	The Estate of Arthur George Hotson
1978 to 1981	Alberta Pieterje Grieve
1981 to 1992	Meadowvale Animal Centre Ltd.
1992 to 2007	Baptist Convention of Ontario and Quebec
2007 to 2018	1716835 Ontario Limited
2018 to Present	3064 Trafalgar Road Inc.

Based on the review of the chain of title, no PCAs were identified.

3.3 Environmental Reports

No previous environmental reports were available for review.

3.4 Environmental Source Information

3.4.1 Federal and Provincial Database Search

A search of provincial, federal and private environmental databases for records pertaining to the Site and properties within the Phase One Study Area was conducted by ERIS. BIG has confirmed neither the completeness nor the accuracy of the records that were provided. A copy of the ERIS report is provided in Appendix E. A summary of the significant findings is provided below.

3.4.1.1 Waste Disposal Sites

The ERIS search included the following waste disposal sites databases:

a) Anderson's Waste Disposal Sites (1860s to present)
b) Waste Disposal Sites – MOE CA Inventory (October 2011 to June 2020)
c) Waste Disposal Sites MOE 1991 Historical Approval Inventory (Up to October 1990)

No records were identified for the Site or the properties within the Phase One Study.

3.4.1.2 Boreholes (1875 to July 2018)

No records were identified for the Site or the properties within the Phase One Study Area.

3.4.1.3 Certificates of Approval (1985 to October 2011)

No records were identified for the Site or the properties within the Phase One Study Area.

3.4.1.4 Ontario Regulation 347 Waste Generator Summary (1986 to April 2020)

The Site was not identified in this database. The waste generators that were identified within the Phase One Study Area are summarized below:

a) The property located at 3070 Trafalgar Road, north adjacent, occupied by OakPark Pet Hospital, was listed as a waste generator of pathological wastes, pharmaceuticals, and photo processing wastes between 2002 and 2014. The property was listed as having operations of veterinary services. As health practitioners have disposal protocol, no PCAs were identified.
b) The property located at 305 Dundas Street East, approximately 120 m south, occupied by Imperial Oil, was listed as a waste generator of waste oils and lubricants, light fuels and oil skimming and sludges from 2006 to 2017. The property was listed as having operation of gasoline station with convenience store. The Site is associated with PCA#10 – Commercial Autobody Shops and PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

3.4.1.5 Dry Cleaning Facilities (January 2004 to December 2017)

No records were identified for the Site or the properties within the Phase One Study Area.

3.4.1.6 National Pollutant Release Inventory (1993 to May 2017)

No records were identified for the Site or the properties within the Phase One Study Area.

3.4.1.7 Fuel Oil Spills and Leaks (Up to February 2017) and TSSA Historic Incidents (2006 to June 2009)

No records were identified for the Site or the properties within the Phase One Study Area.

3.4.1.8 Pesticide Register (1988 to June 2020)

The Site was not identified in this database. The following records were identified for the property within the Phase One Study Area:

a) Four (4) records for the property located at 338 Dundas Street East, approximately 225 m southeast.

These records indicated that the properties were either a vendor, limited vendor or retail vendor of pesticides and no manufacturing of pesticides was identified. As such, no PCAs were identified based on these records.

3.4.1.9 Fuel Storage Tanks

The ERIS search included a search of the following fuel storage tank databases:

a) Fuel Storage Tank (Up to February 2017)
b) Historic Fuel Storage Tank (Pre January 2010)
c) List of Expired Fuels Safety Facilities (Up to February 2017)
d) Private and Retail Fuel Storage Tanks (1989 to 1996)
e) Retail Fuel Storage Tanks (1999 to January 2020)
f) Commercial Fuel Oil Tanks (Up to February 2017)
g) TSSA Variances for Abandonment of Underground Storage Tanks (Up to February 2017)
h) Anderson's Storage Tanks (1915 to 1953)

The Site was not identified in these databases. The following records were identified for the properties within the Phase One Study Area:

a) The property located at 325 Dundas Street East, approximately 115 m southeast, occupied by 1383507 Ontario Ltd., had two (2) records of a gasoline UST in 2009. The property was listed as having operations of a self-serve gasoline station. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.
b) The property located at 341 Dundas Street East (currently 325 Dundas Street West), approximately 115 m southeast, occupied by Iron City Shell, had a record of a retail storage tank in 1993 and 11 records of an expired fuel tank in 1989 and 1992. The property was listed as having operation of gasoline station. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.
c) The property located at 305 Dundas Street West, approximately 120 m south, occupied by Shimeran Nessan O/A Royal Essa Gas Station, Mike's Esso 765853 Ontario Limited, Arman's Esso, Armani'is Esso, Jagdambe Ltd, Dev's Esso, Five Esso, Commisso's Esso, Royal Esso, 1150784 Ontario Ltd O/A Hornby Esso and Vivan Khamis O/A Gas Station had a record of four (4) gasoline USTs and a diesel UST in 2007, two (2) records of a gasoline UST in 2009, two (2) records of a retail storage tank in 1995, a record of an expired propane refill centre, a record of an expired propane tank and 11 records of an expired fuel tank and piping in 1989. The property was listed as having operations of a gasoline station and service station-gasoline, oil and natural gas. The property is associated with PCA#10 – Commercial Autobody Shops and PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

3.4.1.10 Ontario Spills (1988 to November 2019)

The Site was not identified in this database. The following spills were identified for the properties within the Phase One Study Area:

a) A spill of approximately 15 L of gasoline was spilled to the pavement at 305 Dundas Street East approximately 120 m south in 1995, the spill was cleaned up in the same year. The property also had a spill of approximately 1 L to the ground in 1992 and cleaned up in the same year, a spill of approximately 8 L of gasoline to the ground in 1996 and an unknown quantity of leak in the piping system in 2003. The spills were likely transported to the nearest storm sewer or drainage ditch, no PCAs were identified.
b) A spill of approximately 200 L of diesel fuel was spilled to the road and sewer at Trafalgar Road and Dundas Street, approximately 195 m south in 2001. The intersection also had a spill of approximately 20,000 L of mineral oil to land or sewer from tanker in 1988, a spill of approximately 500 L of gasoline in 1988, a spill of unknown quantity of wastewater discharge to watercourse in 1989, a mixture of fuel and water spill in 2012 and a spill of approximately 38 L of diesel fuel to a ditch in 2014. The spills were likely transported to the nearest storm sewer or drainage ditch, no PCAs were identified.

3.4.1.11 Scott's Manufacturing Directory (1992 to March 2011)

No records were identified for the Site or the properties within the Phase One Study Area.

3.4.1.12 Water Well Information System (Up to February 2019)

Three (3) records were identified on Site. The wells were installed from 2017 to 2018 for monitoring/observation purposes to a maximum depth of 10.7 m bgs. Based on the well record, the general soil description of the Site consisted of sand and silt underlain by silt and shale. 37 records were identified within the Phase One Study Area. The wells were installed between 1952 to 2016 for

monitoring, test hole, observation and dewatering purposes at depths ranging from 4.5 m to 29 m bgs. Based on the well records, the general soil stratigraphy in the vicinity of the Site consisted of fill, sand and silty clay top clayey silt underlain by shale.

3.4.2 Municipal City Directories

A search for Halton/Peel City Directories was completed by LGI Copy Service Canada in order to identify the occupancy history of the Site and properties within the Phase One Study Area for potential environmental concerns. Based on the review of the directories dated 1962, 1967, 1974, 1978, 1984, 1989, 1994, and 2000, summarized in Appendix F, the following significant findings were identified:

a) The Site first appeared in the 1978 city directory and was occupied by one (1) residential tenant from 1978 to 1989 and Baptist Church in 1994. Based on the description of operations, no PCAs were identified.
b) The property located at 3070 Trafalgar Road, north adjacent, was occupied by Custom Heating & Air Conditioning between 1978 and 2000, Animal Hospital in 1978 and 1994, Pet Hospital between 1984 and 1989 and 2000 and Kennels between 1984 and 1989. Based on the description of operations, no PCAs were identified.
c) The property located at 3024 Trafalgar Road, approximately 75 m south, was occupied by Ambulance Service in 1974. Based on the description of the operation, no PCAs were identified.
d) The property located at 341 Dundas Street East, approximately 115 m southeast, was occupied by Esso between 1978 and 1984. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.
e) The property located at 305 Dundas Street East, approximately 120 m south, was occupied by Texaco between 1974 and 1994 and Esso in 2000. The property is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.
f) The property at 338 Dundas Street East, approximately 225 m southeast, was occupied by Longo's Grocery between 1978 and 2000 and Nutrition Centre and Wine Rack in 2000. Based on the description of the operations, no PCAs were identified.

The remaining properties within the Phase One Study Area did not appear to be associated with any PCAs as per Table 2, Schedule D of O.Reg.153/04, as amended.

3.4.3 Ontario Ministry of Environment, Conservation and Parks Records

3.4.3.1 Ministry of the Environment, Conservation and Parks (MECP)

The Ministry of Environment, Conservation and Parks (MECP) was contacted through the Freedom of Information and Protection of Privacy Act (FOI) for copies of any records they had pertaining to the Site on July 23, 2020.

A written response from some of the regulatory agencies such as the MECP typically requires several weeks to months. A written response from the MECP is pending at the time of this Phase I ESA. The request is included in Appendix G.

3.4.3.2 MECP Databases

The ERIS report summarized in the Federal and Provincial Database Search section of the report included a summary of MECP databases. The databases include the following: MECP Environmental Bill of Rights (EBR), Environmental Activity and Sector Registry (ESAR), Environmental Compliance Approval (ECA), MECP Brownfields Environmental Site Registry (BESR), MECP Hazardous Waste Information Network (HWIN) and MECP Waste Disposal Sites. The following record was identified:

a) The property located at 278 Dundas Street East, approximately 230 m south, obtained an ECA for municipal and private sewage works in 2018.

Based on the description of the registration, no PCAs were identified.

3.4.4 Technical Standards and Safety Authority

A request was made to the TSSA by email on August 19, 2020 for information regarding fuel storage at the Site and the adjacent properties. A copy of the TSSA request is provided in Appendix G.

An email response from TSSA dated August 20, 2020 was received and is included in Appendix G. Based on the search results, no records were identified at the Site or the adjacent properties.

3.5 Physical Setting Sources

3.5.1 Aerial Photographs

Aerial photographs were obtained in order to review the development and land use history of the Site, as well as to the land in the immediate vicinity of the Site. Aerial photographs dated 1934, 1965 and 1985 were obtained from LGI Copy Service Canada, aerial photographs dated 1999, 2006, 2012, and 2015 were obtained from the Town of Oakville Air Photo History Website. The aerial photographs were collected based on availability from the archives at available intervals to best capture the changes at the Site. BIG notes that at the time of this Phase One ESA, the 1934 aerial photograph was the earliest available photograph for the Site and Phase One Study Area.

The development and land use history of the Site and adjacent properties as depicted on the reviewed aerial photography is summarized in Table 3-1. Copies of the aerial photographs are included in Appendix H.

Table 3-1: Aerial Photograph Observations

Aerial Photograph Year	Observations
1934	a) The Site appears to have been vacant and undeveloped. b) The north adjacent property at 3070 Trafalgar Road appears to be vacant and undeveloped. c) The south adjacent properties between 3024 and 3048 Trafalgar Road appear to be developed with residential dwellings. d) A residential dwelling appears to be developed to the east of Trafalgar Road. e) The surrounding properties to the west appear to be vacant and undeveloped in addition to residential dwellings. A creek is also present to the west of the Site.
1965	a) The Site appears to have been developed with a rectangular building. b) Commercial properties appear to be developed to the south of Dundas Street East. c) A gasoline fuel retail outlet appears to be developed at 305 Dundas Street East.
1985	a) The Site appears to be developed with one building. b) The adjacent properties remain unchanged. c) The property south of Dundas Street East appears to be developed further with commercial properties.
1999	a) The Site remains unchanged.

Aerial Photograph Year	Observations
	b) The north adjacent property at 3070 Trafalgar Road has been developed with an irregularly shaped building and two (2) rectangular buildings.
2006	a) The land at 3075 Trafalgar road appears to have been disturbed.
2012	a) The property at 3075 Trafalgar Road appears to contain heavy equipment and/or operating as a commercial business.
2015	a) Two (2) rectangular building located north adjacent at 3070 Trafalgar Road appear to have been demolished. b) The residential dwelling at 3075 Trafalgar road appears to have been demolished and the Site being redeveloped.

Based on the review of the aerial photographs, no additional PCAs as per Table 2, Schedule D of O.Reg.153/04, as amended, were identified.

3.5.2 Topography, Hydrology and Geology

The following physiographic, geological and soil maps were reviewed on August 20, 2020:

a) Atlas of Canada – Toporama Topographic Map (Toporama);
b) Ontario Base Map (OBM);
c) Ontario Ministry of Energy, Northern Development and Mines (MENDM) website, Bedrock Geology of Ontario, 2011 – MRD 126; and Paleozoic Geology of Southern Ontario, 2007 – MRD 219 (KML format);
d) Ontario MENDM website, Surficial Geology of Southern Ontario, 2010. (KML format); and,
e) Ontario MENDM website, Physiography of Southern Ontario 2007 (KML format).

Based on the review of the above maps, the following information was obtained:

a) The Site is at an elevation of approximately 172 metres above sea level (m asl), generally at the same elevation as properties to the east of the Site. The surrounding properties to the south and west are generally at lower elevation than the Site, and the surrounding properties to the north are generally at higher elevation than the Site. The Site consists of a downgradient slope towards the southeast.
b) The Site does not feature any surface water bodies on or immediately adjacent to the Site. The closest surface water body to the Site is Morrison Creek which is situated approximately 30 m+ north of the Site. Lake Ontario is situated approximately 7 km south of the Site. The inferred groundwater flow direction is likely towards the southeast.
c) The bedrock in the general area consists of shale, limestone, dolostone and siltstone and is part of the Queenston Formation.
d) The surficial geology of the Site is described as till consisting of clay to silt-textured till derived from glaciolacustrine deposits or shale.
e) The physiography of the Site is within the South Slope and is characterized as till plains (drumlinized).

3.5.3 Fill Material

Fill can be used to re-grade a property and to backfill excavations. Based on the review of the historical information, no fill materials have been imported to the Site.

3.5.4 Water Bodies and Areas of Natural Significance

There are no water bodies located on the Site. The closest surface water body to the Site is Morrison Creek which is situated approximately 30 m+ north of the Site. Lake Ontario is situated approximately 7 km south of the Site.

Based on the review of available resources from Savanta (*Significant Natural Areas, 2019)* and the Ministry of Natural Resources and Forestry (MNRF) on August 19, 2020, no areas of natural significance were identified at the Site. Approximately 30+ m west of the Site surrounding Morrison Creek is identified as a Provincially Significant Wetland (MNRF).

3.5.5 Well Records

3.5.5.1 Water Wells

The MECP maintains a database (published from 1955 to present) of water wells drilled in Ontario in accordance with Ontario Regulation 903. The Ontario Well Record website was accessed on August 20, 2020, to identify if any wells exist on the Site or within the Phase One Study Area. Based on the search, there (3) records were identified at the Site. The wells were installed from 2017 to 2018 for monitoring/observation purposes to a maximum depth of 10.7 m bgs. Based on the well record, the general soil description of the Site consisted of sand and silt underlain by silt and shale. 54 records were identified within the Phase One Study Area. The wells were installed between 1952 to 2016 for monitoring, test hole, observation and dewatering purposes at depths ranging from 4.5 m to 29 m bgs. Based on the well records, the general soil stratigraphy in the vicinity of the Site consisted of fill, sand and silty clay top clayey silt underlain by red shale bedrock.

It should be noted that the ERIS report identified three (3) records on Site and 37 records within the Phase One Study Area.

3.5.5.2 Oil, Gas, and Salt Well

A search of the Oil, Gas & Salt Resources Library (2014) website was completed to identify oil, gas and salt wells within the vicinity of the Site on August 20, 2020. The search of the website indicated there were no oil, gas or salt wells identified to be located at the Site or within the Phase One Study Area.

3.5.6 Record of Site Condition (RSC)

An RSC summarizes the environmental conditions of a property as determined by a qualified person (QP) by conducting a Phase One ESA, and where necessary, a Phase Two ESA, confirmatory sampling and a risk assessment. Upon completion of the necessary environmental Site assessments, an RSC for an assessed property can be filed with the MECP and added to the BESR database. This online, publicly available database can be searched to identify what properties may have potential environmental concerns.

Based on the search of the MECP's BESR database completed by ERIS, no records were identified at the Site. The following records were identified for the properties within the Phase One Study Area:

a) The property located at 3070 Trafalgar Road, north adjacent of the Site, filed a Phase One RSC for residential use in 2015.
b) The property located at 3075 Trafalgar Road, approximately 35 m east, filed a Phase One RSC for residential use in 2015.

Based on the description of the records, no PCAs were identified.

3.6 Site Operating Records

In general, a request is usually made to the property representative for copies of any operating records pertaining to the environmental conditions at the Site. Records would include: regulatory permits; Safety Data Sheets (SDS) for all chemicals that were handled on-Site; underground utility drawings; inventories of chemicals, chemical usage, and chemical storage areas; inventory of aboveground storage tanks (ASTs) and USTs; environmental monitoring data; correspondence pertaining to an order or request by the MECP or TSSA; waste management records; process, production, and maintenance documents; records of spills and records of discharges of chemicals; emergency response and contingency plans, including spill prevention and contingency plans; environmental audit reports; and site plans of the facility showing areas of production and manufacturing.

No Site operating records were available to review.

4. Interviews

An interview was conducted by BIG staff with the individual identified to be the most knowledgeable about both the current and historical Site uses. The interview was conducted by email in order to obtain information to assist in identifying details of potentially contaminating activities, potential contaminant pathways in, on, or below the Site, and areas of potential environmental concern. Any information provided during the interviews is presented alongside information from the Site reconnaissance in Section 5.

During the completion of this Phase One ESA, the following individual was interviewed:

a) Mr. Clarence Qian, Development Manager of Distrikt Capital, who has known about the Site for approximately 1.5 years.

Information obtained during the interview is provided below, in the relevant sections.

5. Site Reconnaissance

5.1 General Requirements

The Phase One ESA Site reconnaissance was conducted on August 19, 2020 between 10 am and 11 am by Mr. Fernando Contento, M.Env.Sc., P.Geo.

The Site and the adjoining properties were observed from the Site and/or publicly accessible areas. Photographs documenting the Site visit are included in Appendix I.

5.2 Specific Observations at Phase One ESA Property

5.2.1 Site Description and Buildings

The Site is located north of Dundas Street West and west of Trafalgar Road in Oakville, Ontario. The Site location plan is shown on Figure 1. The Site measures approximately 7,500 m² in size and is currently occupied by a one (1)-storey building (Site building). The Site building has a footprint of approximately 50 m² and occupy approximately 1 % of the Site. The Site building was likely constructed in the 1960s. The areas surrounding the Site building are covered with gravel, grass, and shrubs.

The characteristics of the main Site building are summarized below:

Building Portion	**Material Description**
Interior Walls	Drywall, Wood
Floor	Carpet, Concrete, Vinyl Tile
Ceiling	Drywall
Roof	Masonry
Exterior Walls	Brick and Masonry

5.2.2 Heating and Cooling Systems

The Site building is heated with natural gas fired boiler.

5.2.3 Site Utilities and Services

The Site utilities and services were identified at the Site based on the relevant utility infrastructure observed during the Site reconnaissance and are summarized in the table below. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	**Source**	**Location**	**Site Entry**
Water	Municipality – Town of Oakville	East	A water main is located to the east of the Site on Trafalgar. The water line is anticipated to enter the Site along the eastern Site boundary.
Natural Gas	Unknown	East	Given that the Site is located in a mixed residential and commercial area, the natural gas lines are anticipated to run along Trafalgar Road.
Electricity	Hydro	East	Overhead hydro lines were observed along Trafalgar Road.

5.2.4 Site Production and Manufacturing

No on-Site production or manufacturing processes were observed at the Site during the Site reconnaissance.

5.2.5 Drains, Pits and Sumps

A sump pump was identified within the basement of the residential dwelling on-Site. As no hazardous materials, waste oils, tanks or potentially contaminating activities were identified within the residential dwelling, the sump pump is not considered a concern.

5.2.6 Storage Tanks

5.2.6.1 Underground Storage Tanks (UST)

The presence/absence and condition (if present) of USTs at the Site was assessed during the Site reconnaissance. BIG did not observe any evidence of USTs during the Site reconnaissance, and the Site representative confirmed no historical or current USTs at the Site.

5.2.6.2 Aboveground Storage Tanks (AST)

The presence/absence and condition (if present) of ASTs at the Site was assessed during the Site reconnaissance. BIG did not observe any evidence of ASTs during the Site reconnaissance, and the Site representative confirmed no historical or current ASTs at the Site.

5.2.7 Water Wells

No potable water wells were observed during the Site or within the Phase One Study Area reconnaissance. Multiple monitoring wells were observed at the Site during the Site reconnaissance.

5.2.8 Site Housekeeping

The Site is well maintained. No other debris, outdoor storage, or uncontrolled waste storage were noted during the Site reconnaissance.

5.2.9 Chemical Storage and Handling and Floor Condition

Chemical storage and household cleaning products were not observed at the Site. Floor conditions indicated presence of water damage and mould.

5.2.10 Areas of Stained Soil, Pavement or Stressed Vegetation

No staining on the pavement surfaces and no stressed vegetation was observed at the time of the Site reconnaissance.

5.2.11 Fill and Debris

Fill can be used to re-grade a property and to backfill excavations, such as locations of former USTs. No fill piles or debris were observed at the Site during the Site reconnaissance.

5.2.12 Air Emissions

Regulatory control of air emissions in Ontario is the responsibility of the MECP. No sources of active air emissions were noted at the Site or within the Phase One Study Area during the Site reconnaissance.

5.2.13 Polychlorinated Biphenyls (PCBs)

The manufacture of PCBs in North America was prohibited under the Toxic Substances Control Act (1977). Their use as a constituent of new products manufactured in or imported into Canada was prohibited by regulations in 1977 and 1980. As such, sites developed or significantly renovated after 1980 are unlikely to have PCB-containing equipment on the Site. Potential equipment, which could contain PCBs include fluorescent mercury and sodium vapour light ballasts, oil filled capacitors and transformers. Any electrical

equipment containing PCBs must be disposed in accordance with Ontario Regulation 362 when it is removed from service. Ongoing operation of equipment containing PCBs is permissible.

Based on the records review and the Site reconnaissance, no significant sources of PCBs were present on the Site.

5.3 Enhanced Investigation Property Observations

An Enhanced Investigation Property is "(i) a property used, or has ever been used, in whole or part, for an industrial purpose, or (ii) a commercial property used as a garage, a bulk liquid dispensing facility, including a gasoline outlet or for the operation of dry cleaning equipment" (O.Reg. 153/04).

Based on the records review, the Site is not classified as an Enhanced Investigation Property.

5.4 Adjacent and Surrounding Properties

A visual inspection of the adjacent properties and properties within the Phase One Study Area was conducted from publicly accessible areas to identify the occupants; and to document any PCAs that may be contributing to an APEC at the Site.

Location of Adjoining Properties	Property Use
North	Vacant Land
South	Residential Properties followed by gasoline fuel retail station and Dundas Street East
East	Trafalgar Road followed by residential properties
West	Vacant Land followed by Morrison Creek and residential properties

Based on the visual inspection of adjacent and surrounding properties within the Phase One Study Area, the following PCA was identified:

a) The property located at 305 Dundas Street East, approximately 120m south, is currently occupied by a gasoline fuel retail station. The Site is associated with PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks.

5.5 Written Description of Investigation

A reconnaissance of the Site was conducted by BIG to examine the exterior and interior of all on-Site buildings and structures, and to examine the exterior portions of the Site. Access was provided to the interiors of Site buildings, if any. Mechanical equipment (including heating and cooling systems) was documented and characterized, as was any evidence of USTs and ASTs. The exterior portions of the Site were examined for evidence of utilities and related infrastructure; water wells; Site drainage and related infrastructure; stained areas; stressed vegetation; and evidence of fill material.

The reconnaissance included an examination of all properties within the Phase One Study Area from public access ways to document and characterize PCAs, water bodies and areas of natural significance.

6. Review and Evaluation of Information

6.1 Current and Past Uses

Based on the reviewed records, the Site was first developed from vacant and undeveloped to residential use in the 1960s. A more detailed discussion of the Site history based on the available documentation is provided in the following sections of the report. The current and past ownership of the Site is summarized in Table II.

6.2 Potentially Contaminating Activities (PCAs)

A list of all the PCAs identified at the Site and within the Phase One Study Area is summarized below and included as Table III and on Figure 2. Based on the inferred groundwater flow direction to the southeast, the properties within the Phase One Study Area to the south of the Site are considered to be hydraulically downgradient of the Site; properties to the northwest are considered to be hydraulically upgradient of the Site; and the properties to the west and east of the Site were considered to be hydraulically trans-gradient to the Site. Any PCAs located downgradient or trans-gradient of the Site are not considered to be contributing to an APEC on Site.

Furthermore, any PCAs located significantly distant from the Site were considered to be too far to be contributing to an APEC on the Site.

Rationale outlining whether a PCA contributed to an APEC at the Site is summarized below and provided in Table III.

PCA Identifier	Address	PCA	PCA Location	Contributing to APEC at the Site?	Rationale
1.	305 Dundas Street East	Former USTs (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)	Off-Site (120 m south)	No	Located downgradient
2.		Service Station (PCA#10 – Commercial Autobody Shops)			
3.	325 Dundas Street East	Former USTs (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)	Off-Site (115 m southeast)	No	Located downgradient
4.		Service Station (PCA#10 – Commercial Autobody Shops)			
5.	341 Dundas Street East	Former USTs (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)	Off-Site (115 m southeast)	No	Located downgradient
6.		Service Station (PCA#10 – Commercial Autobody Shops)			

No other PCAs were identified for the surrounding properties.

6.3 Areas of Potential Environmental Concern (APECs)

A total of six (6) PCAs were identified at the Site, none of which were considered as APECs, as they were either located at a significant distance from the Site or were located hydraulically downgradient or trans-gradient to the Site. Therefore, there are no APECs associated with the Site.

6.4 Phase One ESA Conceptual Site Model

This section presents the Phase One Conceptual Site Model providing a narrative, graphical and tabulated description integrating information related to the Site geologic and hydrogeologic conditions, areas of potential environmental concern/potential contaminating activities, and the presence and distribution of potential contaminants of concern. These components are discussed in the following sections.

Surface Features

The Site is located north of Dundas Street West and west of Trafalgar Road in Oakville, Ontario. The Site location plan is shown on Figure 1. The Site measures approximately 7,500 m² in size and is currently occupied by a one (1)-storey building (Site building). The Site building has a footprint of approximately 50 m² and occupy approximately 1 % of the Site. The Site building was constructed between 1965 – 1985 with an approximate estimate of 1978 based on municipal city directories. The areas surrounding the Site building are covered with gravel, grass, and shrubs.

The legal description of the Site as obtained from the chain of title is “Part Lot 13, Concession 1 Trafalgar, North of Dundas Street, as in 787579; Oakville/Trafalgar”. The Property Identification Number (PIN) is 24929-0103 (LT). The legal survey plan is included in Appendix B.

Surrounding Land Use

The Site is bound to the north by vacant land, to the east by Trafalgar Road followed a drainage pond and residential properties, to the west vacant land followed by Morrison Creek and residential properties, and to the south by residential properties followed by a gasoline retail fuel station, commercial properties, and Dundas Street East. The surrounding properties are shown on Figure 2.

Geological and Hydrogeological Conditions

The Site is at an elevation of approximately 170 metres above sea level (m asl), generally at the same elevation as properties to the west of the Site. The surrounding properties to the south and east are generally at lower elevation than the Site, and the surrounding properties to the north are generally at higher elevation than the Site. The Site consists of a downgradient slope towards the east southeast.

The bedrock in the general area consists of shale, limestone, dolostone and siltstone and is part of the Queenston Formation. The surficial geology of the Site is described as till consisting of clay to silt-textured till derived from glaciolacustrine deposits or shale. The physiography of the Site is within the South Slope and is characterized as till plains (drumlinized).

There are no water bodies located on the Site. The closest surface water body to the Site is Morrison Creek which is situated approximately 30 m+ north of the Site. Lake Ontario is situated approximately 7 km south of the Site.

Based on the review of available resources from Savanta (*Significant Natural Areas, 2019)* and the Ministry of Natural Resources and Forestry (MNRF) on August 19, 2020, no areas of natural significance were identified at the Site. The area 30 m + west of the Site surrounding Morrison Creek is identified as a Provincially Significant Wetland (MNRF).

Underground Utilities

The Site utilities and services were identified at the Site based on the relevant utility infrastructure observed during the Site reconnaissance and are summarized in the table below. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Source	Location	Site Entry
Water	Municipality – Town of Oakville	East	A water main is located to the east of the Site on Trafalgar. The water line is anticipated to enter the Site along the eastern Site boundary.
Natural Gas	Unknown	East	Given that the Site is located in a mixed residential and commercial area, the natural gas lines are anticipated to run along Trafalgar Road.
Electricity	Hydro	East	Overhead hydro lines were observed along Trafalgar Road.

Potentially Contaminating Activities and Areas of Potential Environmental Concern:

A total of six (6) PCAs were identified at the Site, none of which were considered as APECs, as they were either located at a significant distance from the Site or were located hydraulically downgradient or trans-gradient to the Site. Therefore, there are no APECs associated with the Site.

7. Conclusions

Based on the findings and conclusions of the Phase One ESA, a Phase Two ESA is not required to assess the soil and groundwater conditions at the Site.

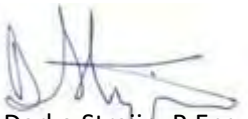
7.1 Closure

This Phase One ESA was conducted in accordance with O.Reg.153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, BIG makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

Yours truly,

B.I.G. Consulting Inc.

Fernando Contento, M.Env.Sc., P.Geo.
Project Manager



Darko Strajin, P.Eng.

Table II

TABLE OF CURRENT AND PAST LAND USES OF THE SITE
(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)
3064 Trafalgar Road, Oakville, ON

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
3064 Trafalgar Road – 24929-0103 (LT)				
Prior to 1808	The Crown	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1934.
1808 to 1809	Abraham Grubb	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1934.
1809 to 1816	Peter Cline	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1934.
1816 to 1836	James Thompson	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1934.
1836 to 1880	Estate of James Applebe (Sr.)	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1934.
1880 to 1863	James Applebe (Jr.)	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1934.
1883 to 1901	Estate of George Ford	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1934.
1901 to 1904	John E. Ford	Undeveloped	Agricultural or other use	No FIP or aerial photograph coverage available prior to 1934.
1904 to 1943	Estate of Francis Edward Ford	Undeveloped	Agricultural or other use	Based on the Aerial Photograph from 1934 the Site appears to have been undeveloped.
1943 to 1952	Clarence Featherstone Ford	Undeveloped	Agricultural or other use	Based on the Aerial Photograph from 1934 the Site appears to have been undeveloped.
1952 to 1955	Wilfred Samuel Hall	Undeveloped	Agricultural or other use	Based on the Aerial Photograph from 1934 the Site appears to have been undeveloped.
1955 to 1956	Allan W. Hall and Wife	Undeveloped	Agricultural or other use	Based on the Aerial Photograph from 1934 the Site appears to have been undeveloped.
1956 to 1957	Frederick J. MacNamara and Wife William Scade	Undeveloped	Agricultural or other use	Based on the Aerial Photograph from 1934 the Site appears to have been undeveloped.
1957 to 1965	Albert Peters and Wife	Residential	Residential Use	Based on the Aerial Photograph from 1965 the Site appears to have been developed with a rectangular building. The city municipal directories indicate a residential tenant as of 1978.
1965 to 1972	The Estate of Mary Josephine Hotson	Residential	Residential Use	Based on the Aerial Photograph from 1965 the Site appears to have been developed with a rectangular building. The city municipal directories indicate a residential tenant as of 1978.
1972 to 1978	The Estate of Arthur George Hotson	Residential	Residential Use	Based on the Aerial Photograph from 1965 the Site appears to have been developed with a rectangular building. The city municipal directories indicate a residential tenant as of 1978.

Table II

TABLE OF CURRENT AND PAST LAND USES OF THE SITE

(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)

3064 Trafalgar Road, Oakville, ON

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
1978 to 1981	Alberta Pieterje Grieve	Residential	Residential Use	Based on the Aerial Photograph from 1965 the Site appears to have been developed with a rectangular building. The city municipal directories indicate a residential tenant as of 1978.
1981 to 1992	Meadowvale Animal Centre Ltd.	Residential	Residential Use	Based on the Aerial Photograph from 1985 the Site appears to have been developed with a rectangular building. The city municipal directories indicate a residential tenant as of 1978.
1992 to 2007	Baptist Convention of Ontario and Quebec	Residential	Residential Use	Based on the Aerial Photograph from 1999 the Site appears to be developed with an irregularly shaped building and two (2) rectangular buildings. The city municipal directories indicate a Baptist Church as of 1994.
2007 to 2018	1716835 Ontario Limited	Residential	Residential Use	Based on the Aerial Photograph from 2015 the Site appears to remain unchanged since the 1999 aerial photograph. The city municipal directories indicate a Baptist Church as of 1994.
2018 to Present	3064 Trafalgar Road Inc.	Residential	Residential Use	Currently a residential dwelling exists at the Site.

Notes:

1 - For each owner, specify one of the following types of property use (as defined in O.Reg. 153/04) that applies:

- Agricultural or other use
- Commercial use
- Community use
- Industrial use
- Institutional use
- Parkland use
- Residential use

2 - When submitting a Record of Site Condition for filing, a copy at this table must be attached.

Table III

POTENTIALLY CONTAMINATING ACTIVITIES (PCAs)

(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)

3064 Trafalgar Road, Oakville, ON

PCA Identifier	Address	Location of Activity (In relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Description and Approximate timeline that PCA Occurred	Contribution to APEC at the Site
1.	305 Dundas Street East	Off-Site (120 m south)	Former USTs (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)	Based on the FIP, aerial photographs, and ERIS records, a gasoline retail fuel station was located at 305 Dundas Street East, approximately 120 m south, with USTs located in the south/southeast portion of the property.	None Located downgradient
2.			Service Station (PCA#10 – Commercial Autobody Shops)	Based on the FIP, aerial photographs, and ERIS records, a service station was located at 305 Dundas Street East, approximately 120 m south.	None Inferred trans-gradient
3.	325 Dundas Street East	Off-Site (115 m southeast)	Former USTs (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)	Based on ERIS records, a gasoline retail fuel station was located at 325 Dundas Street East, approximately 115 m southeast, with USTs located on the property.	None Located downgradient
4.			Service Station (PCA#10 – Commercial Autobody Shops)	Based on ERIS records, a gasoline service station was located at 325 Dundas Street East, approximately 115 m southeast, with USTs located on the property.	None Located downgradient
5.	341 Dundas Street East	Off-Site (115 m southeast)	Former USTs (PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks)	Based on ERIS records, a gasoline retail fuel station and service station was located at 341 Dundas Street East, approximately 115 m southeast, with USTs located on the property.	None Located downgradient
6.			Service Station (PCA#10 – Commercial Autobody Shops)		

Notes:

(1) Distances are approximately only. Precise distances are not possible due to the age of some listings and the aggregation and/or loss of addresses.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg 153/04. as amended) which is occurring or has occurred in a Phase One Study Area.

Table IV

AREAS OF POTENTIAL ENVIRONMENTAL CONCERN (APECs)

(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)

5, 7, 9, 11, 13, and 15 Raglan Avenue, Toronto, Ontario

Area of Potential Environmental Concern (APEC)[1]	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)[2]	Location of PCA (On-Site or Off-Site)[2]	Potential Contaminants of Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
No APECs were identified.					

Notes:

1, Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more contaminants are potentially present, as determined through the P1 ESA, including through,

(a) Identification of post or present uses on, in or under the phase one property, and

(b) Identification of potentially contaminating activities.

2. Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area

3. When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

ABNs	PCB:	Metals	Electrical Conductivity
CPs	PAHs	As, Sb, Se	Cr (Vi)
1,4- Dioxane	THMs	Na	Hg
Dioxins/Furans, PCDDs/PCDFs	VOCs	B-HWS	Methyl Mercury
Ocs	BTEX	Cl-	high pH
PHCs	Ca,	Mg	CN- low pH

4. When submitting a record of site condition for filing, a copy of this table must be attached

SAR = Sodium Adsorption Ratio

PHCs = Petroleum Hydrocarbons

PCBs = Polychlorinated Biphenyl

(1) Distances are approximately only. Precise distances are not possible due to the age of some listings and the aggregation and/or loss of addresses.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg. 153/04. as amended) which is occurring or has occurred in a Phase One Study Area

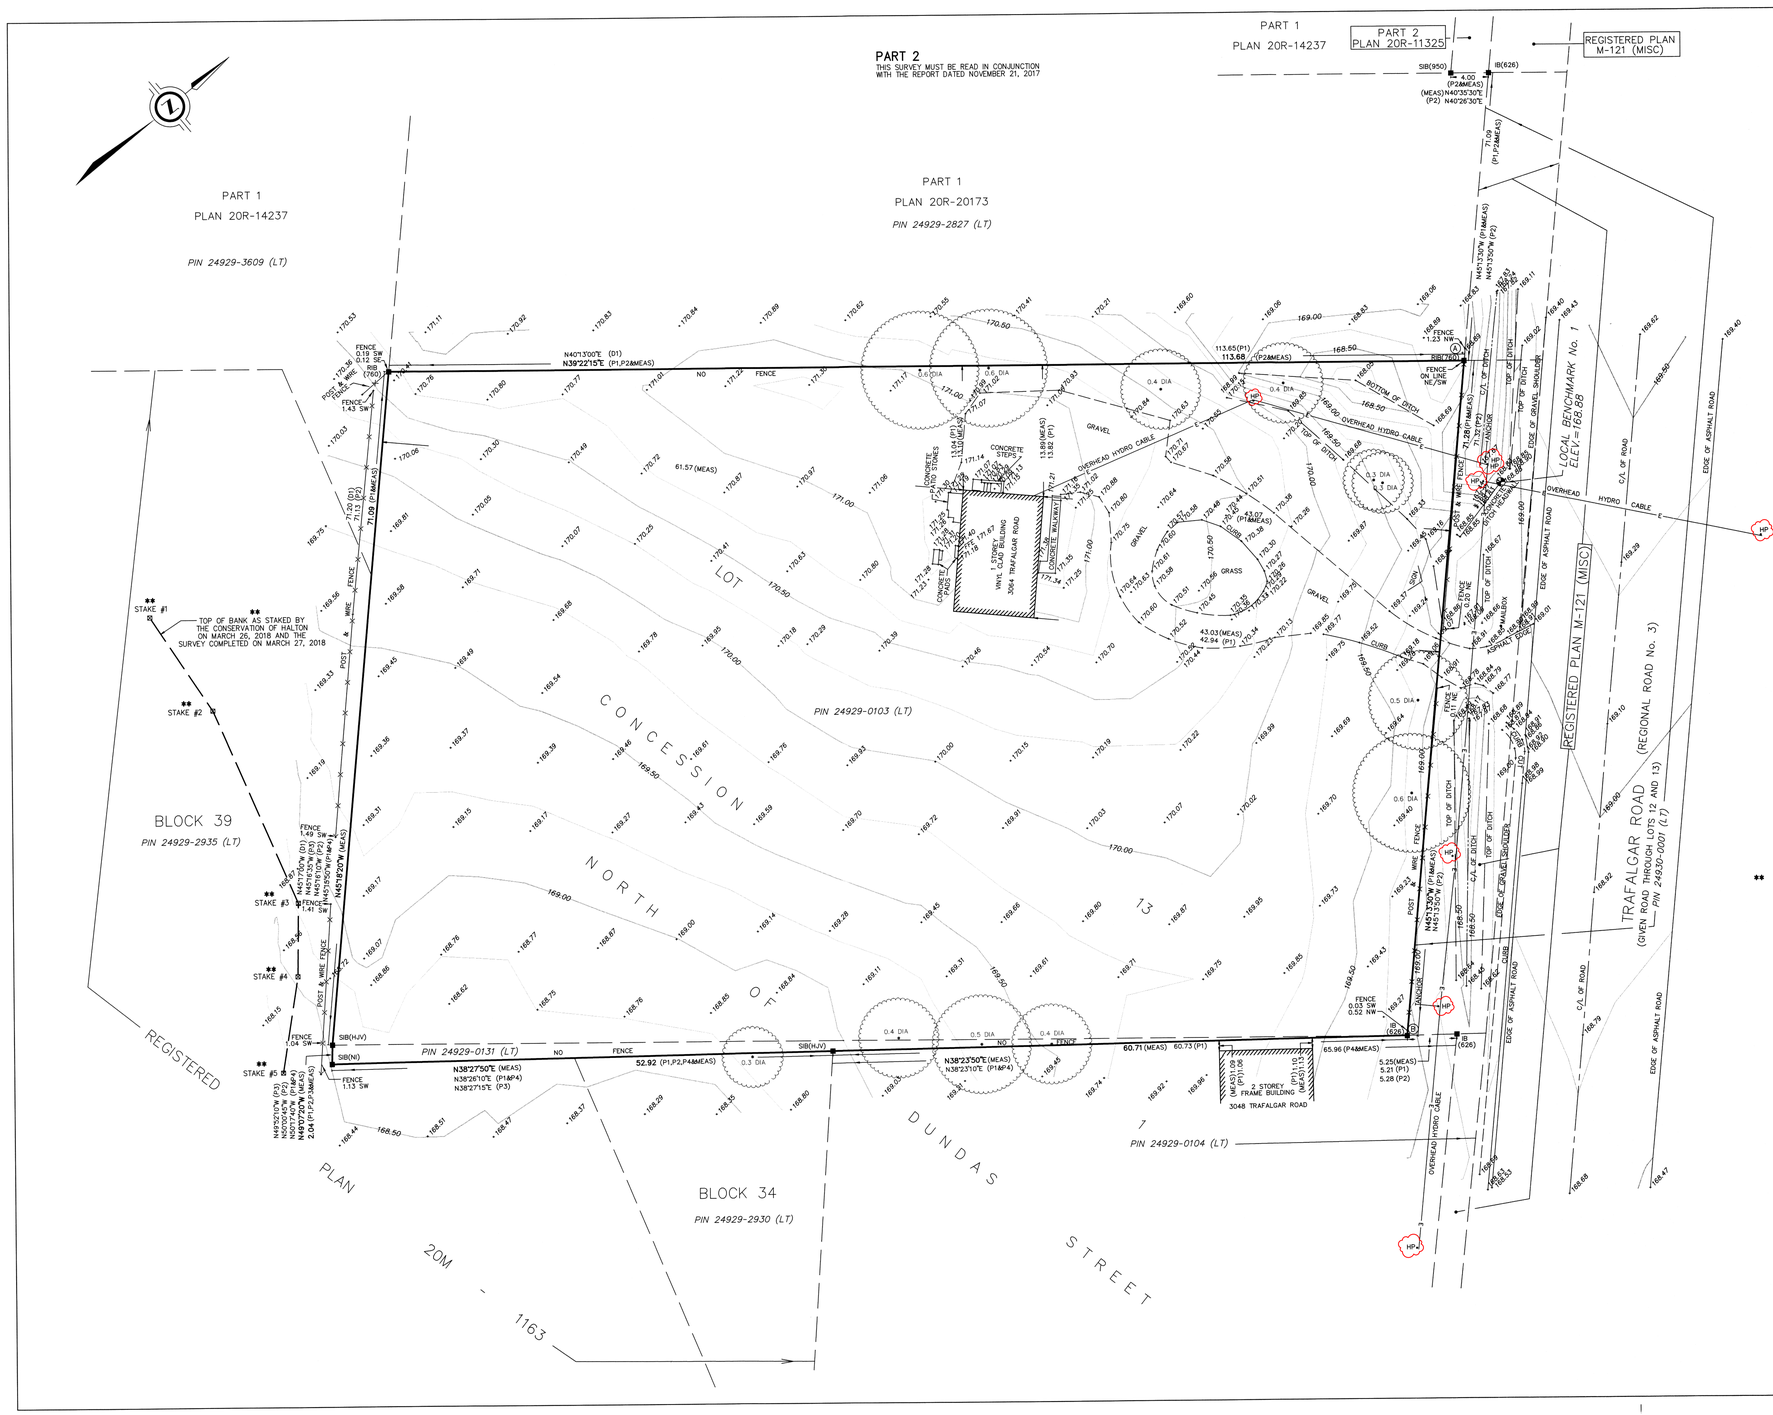
APPENDIX A: LIMITATION OF LIABILITY, SCOPE OF REPORT, AND THIRD-PARTY RELIANCE

Limitation of Liability, Scope of Report, and Third Party Reliance

The information presented in this report is based on visual site inspection and following the general guidance provided in the O.Reg.153/04 as amended. The objectives of the investigation were to evaluate the current environmental conditions of the subject property. The observations, conclusions and recommendations presented in this report are based on the site conditions existing at the time of BIG's site visit. If in the future, a Record of Site Condition (RSC) is pursued or additional information is become available or revealed through intrusive on-site testing, BIG should be contacted to re-evaluate the information presented in this report, if required.

This report was prepared for the exclusive use of Distrikt Capital. BIG's consent is required to reproduce this report in whole or in part. BIG is not responsible for any decision made or reliance by a third party makes of this report. BIG is not responsible for any damages, suffered by a third-party as result of the use of this report.

APPENDIX B: LEGAL SURVEY PLAN



SURVEYOR'S REAL PROPERTY REPORT
SHOWING TOPOGRAPHY
PART 1 - PLAN SHOWING

PART OF LOT 13, CONCESSION 1 NORTH OF DUNDAS STREET

GEOGRAPHIC TOWNSHIP OF TRAFALGAR

TOWN OF OAKVILLE

REGIONAL MUNICIPALITY OF HALTON

SCALE 1 : 250

5 0 5 10 15 metres

J.D. BARNES LIMITED

METRIC DISTANCES AND/OR COORDINATES SHOWN ON THIS PLAN ARE IN METRES AND CAN BE CONVERTED TO FEET BY DIVIDING BY 0.3048.

PART 2 - SURVEY REPORT

- DESCRIPTION
  PART OF LOT 13, CONCESSION 1, NORTH OF DUNDAS STREET, GEOGRAPHIC TOWNSHIP OF TRAFALGAR, TOWN OF OAKVILLE
- REGISTERED EASEMENTS AND/OR RIGHTS-OF-WAY
  NONE REGISTERED
- BOUNDARY FEATURES
  NOTE LOCATION OF FENCES ALONG EASTERN AND WESTERN LIMIT OF PARCEL 24929-0103 (LT).
- ZONING COMPLIANCE
  COMPLIANCE WITH ONTARIO BUILDING CODE SETBACK REQUIREMENTS ARE NOT VERIFIED BY THIS SURVEY.
- ADDITIONAL REMARKS
  PLAN PREPARED FOR DISTRIKT DEVELOPMENTS

NOTES

BEARINGS ARE UTM GRID, DERIVED FROM GPS OBSERVATIONS USING REAL TIME NETWORK (RTN) OBSERVATIONS, UTM ZONE 17, NAD83 (CSRS) (2010.0).

DISTANCES ARE GROUND AND CAN BE CONVERTED TO GRID BY MULTIPLYING BY THE COMBINED SCALE FACTOR OF 0.999709.

BEARING COMPARISONS SHOWN FOR D1 ARE WITH ASTRONOMIC BEARINGS.

ALL BUILDING TIES ARE TAKEN TO CONCRETE FOUNDATION

INTEGRATION DATA

OBSERVED REFERENCE POINTS (ORPs): UTM ZONE 17, NAD83 (CSRS) (2010.0).

COORDINATES TO URBAN ACCURACY PER SECTION 14 (2) OF O.REG 216/10.

POINT ID	EASTING	NORTHING
ORP (A)	603 331.06	4 815 966.44
ORP (B)	603 381.67	4 815 916.25

COORDINATES CANNOT, IN THEMSELVES, BE USED TO RE-ESTABLISH CORNERS OR BOUNDARIES SHOWN ON THIS PLAN.

ELEVATION NOTE

ELEVATIONS SHOWN ON THIS PLAN ARE DERIVED FROM TOWN OF OAKVILLE BENCHMARK NUMBER 276 ON TOP OF NORTH END OF CONCRETE CULVERT 1.6 KM EAST OF BURNHAMTHORPE AND TRAFALGAR ROAD. ELEVATION = 175.722 m

LOCAL BENCHMARK No. 1

NORTHEAST CORNER OF CONCRETE DITCH HEADWALL
ELEVATION = 168.88 m

IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO VERIFY THAT THE LOCAL BENCHMARK HAS NOT BEEN ALTERED OR DISTURBED AND THAT THE RELATIVE ELEVATION AND DESCRIPTION AGREE WITH THE INFORMATION SHOWN ON THIS SKETCH

BEFORE DIGGING, UNDERGOUND SERVICES HOULD BE LOCATED ON SITE BY THE RESPECTIVE AGENCIES

** THIS PLAN WAS EDITTED ON MARCH 29, 2018 TO SHOW TOP OF BANK AS STAKED ON MARCH 26, 2018 AND SURVEYED ON MARCH 27, 2018.

SURVEYOR'S CERTIFICATE

I CERTIFY THAT:

1. THIS SURVEY AND PLAN ARE CORRECT AND IN ACCORDANCE WITH THE SURVEYS ACT, THE SURVEYORS ACT AND THE REGULATIONS MADE UNDER THEM.
2. THE SURVEY WAS COMPLETED ON NOVEMBER 1, 2017.

APPENDIX C: QUALIFICATION OF ASSESSORS

Qualifications of Accessors

The records review and the Site visit were conducted by Mr. Fernando Contento, who has been trained to conduct Phase I ESAs in accordance with O. Reg 153 and CSA Standard Z768-01. Fernando is a registered Professional Geoscientist in Ontario (P.Geo) and has a Master's degree in Environmental Science from University of Toronto and has completed numerous Phase One and Phase Two ESA reports under Ontario jurisdiction. She had been involved in Environmental Site Assessments, risk assessments, remediation projects and environmental management report reviews under Federal jurisdiction.

Mr. Darko Strajin, is the Partner of BIG, he is a licensed engineer in province of Ontario and has over 25 years of consulting experience. Darko has been involved in conducting Phase One and Phase Two Environmental Site Assessments for more than 20 years. Darko has been responsible for successfully managing numerous environmental investigations and site assessments. Darko has in depth knowledge of Environmental Regulations including experience in geology, hydrogeology and geotechnical engineering that enables him to provide superior services to his client in the environmental industry. Darko has registered with the MECP as QP (Environmental Site Assessment) and has filed number of Record of Site Condition documents over the years.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2019

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jan 31, 2020

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.
Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.
The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Chemical Register: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Jun 2020

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Dec 2019

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Jun 30, 2020

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Jun 30, 2020

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Jun 30, 2020

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Jun 30, 2020

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Apr 30, 2020

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.
The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2020

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.
The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2020

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.
The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2020

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2020

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2019

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jun 30, 2020

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Jun 30, 2020

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.
The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Jun 30, 2020

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-May 2020

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jan 31, 2020

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.
The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Nov 2019

Wastewater Discharger Registration Database: Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.
The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Jun 30, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Feb 28, 2019

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

From: Public Information Services <publicinformationservices@tssa.org>
Sent: August 20, 2020 9:19 AM
To: Fernando Contento <fcontento@brownfieldigi.com>
Subject: RE: Request for Environmental Information

NO RECORD FOUND (FUEL STORAGE TANKS ONLY)

Hello. Thank you for your request for confirmation of public information.

We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationservices@tssa.org or through mail along with a fee of $56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Gaya

Subject: Request for Environmental Information

Good afternoon Madam/Sir,

I would like to submit a request for Environmental Information for the following properties in Oakville, Ontario:

1. 3064 Trafalgar Road, Oakville, ON (The Site)
2. 3070 Trafalgar Road
3. 3048 Trafalgar Road
4. 3040 Trafalgar Road
5. 3030 Trafalgar Road
6. 3075 Trafalgar Road
7. 3076 Trafalgar Road

As part of our historical review for a Phase I ESA, I am requesting that the Technical Standards and Safety Authority (TSSA), Safety Fuel Division, review its database to identify to us any records of aboveground/underground storage

tanks, spills, incidents, complaints, notices, tanks removals and/or remediation, etc. with the TSSA for the above-mentioned site.

Your earliest attention to this matter is much appreciated. For your convenience, you may email me or call me with any information you may have for the properties.

Regards,

Fernando Contento, P.Geo

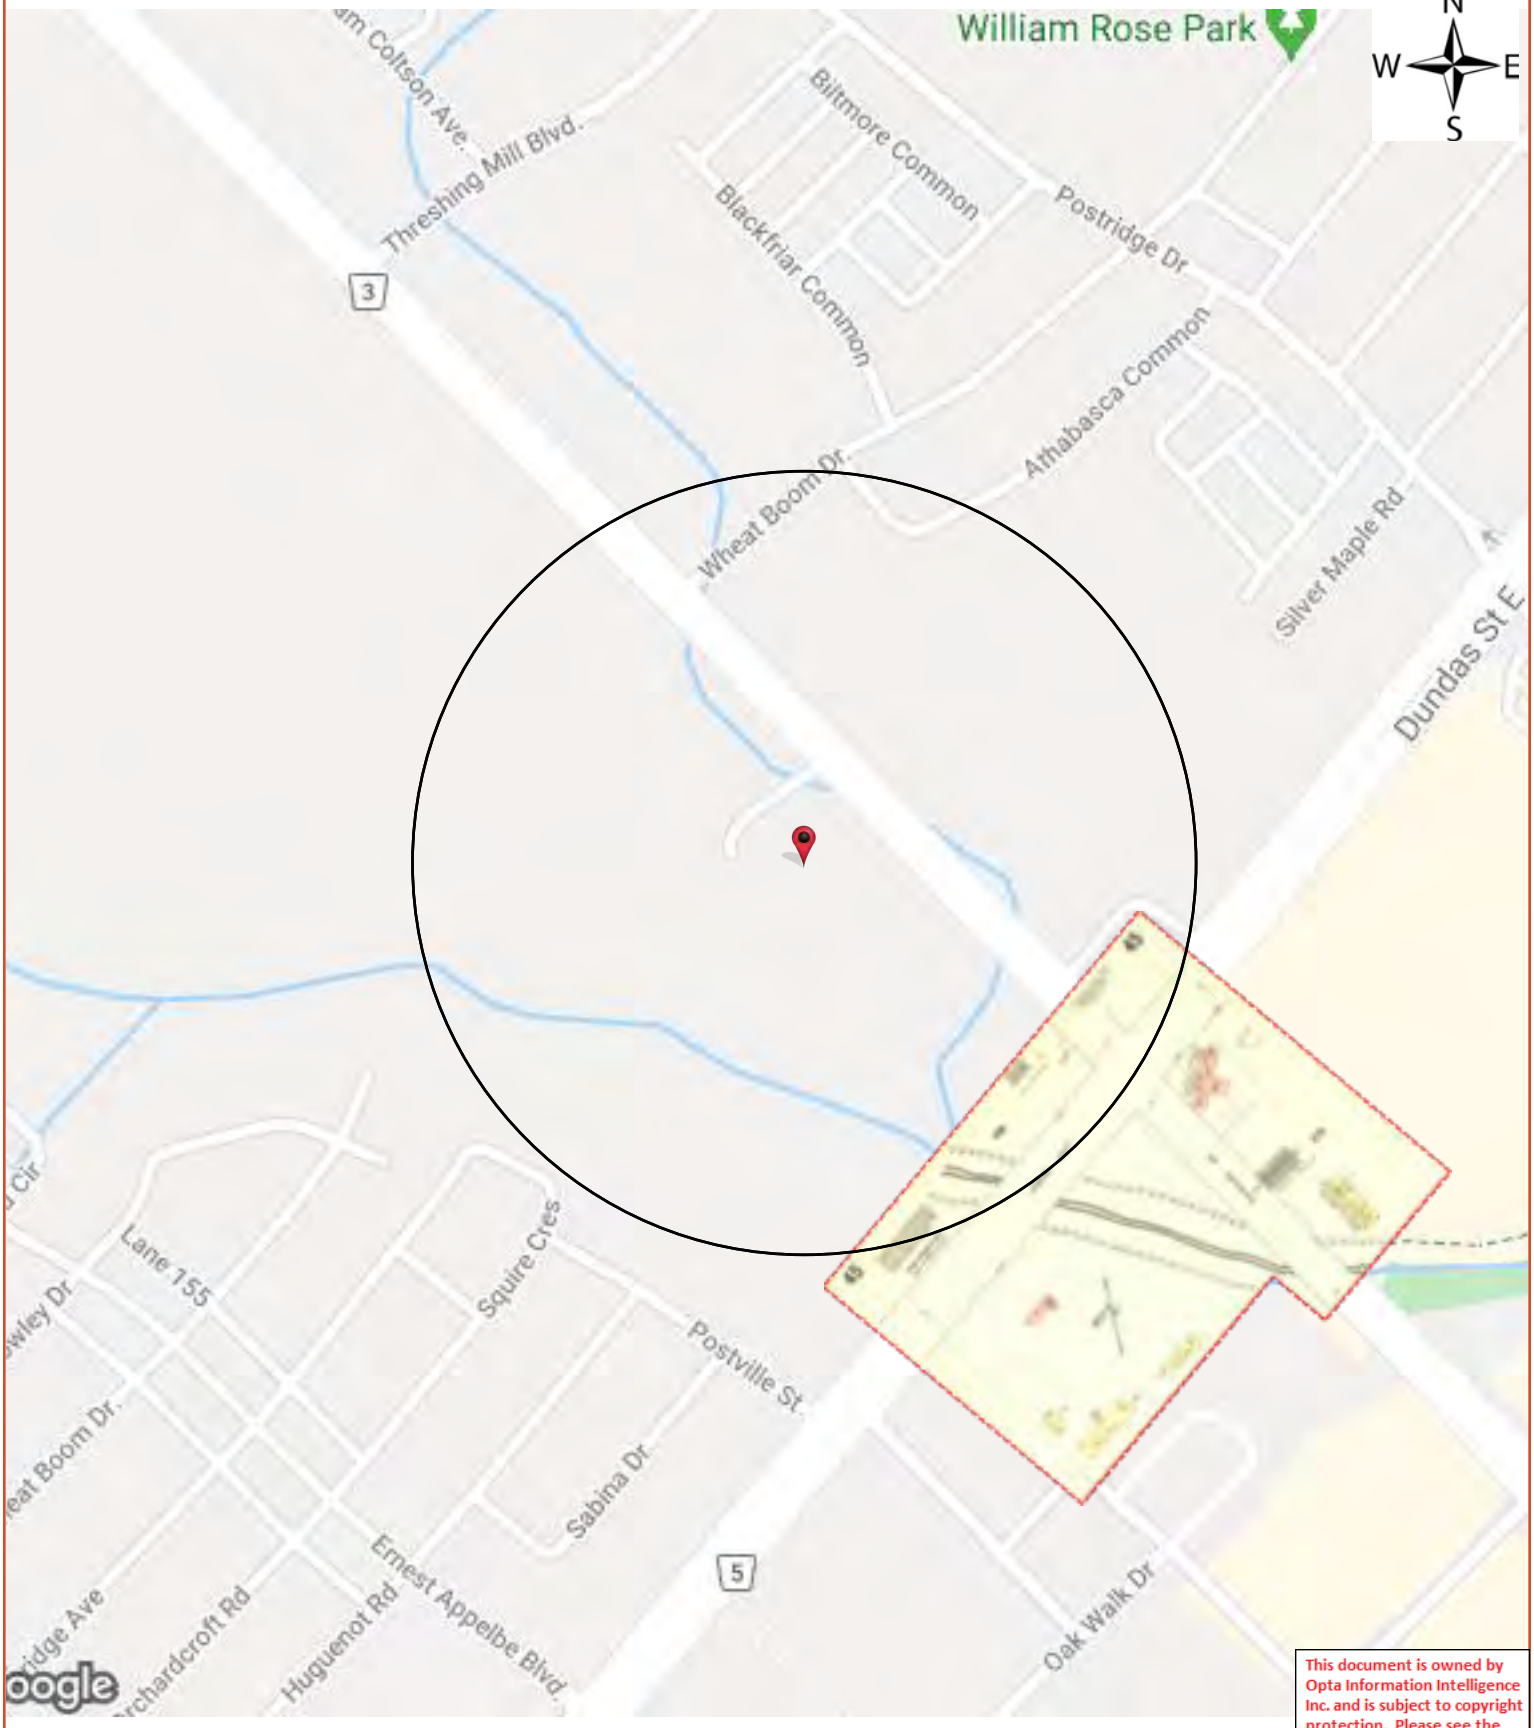
OPTA INFORMATION INTELLIGENCE



Opta Historical Environmental Services Enviroscan™ Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.
